## SUMMARY

As a third-year B.Tech student in Al & Data Science, I am passionate about bridging the gap between complex data analytics and scalable web solutions. My technical foundation is built on Python, Java, and Full-Stack development, driven by a desire to tackle intricate challenges through intelligent automation.

## EDUCATION

**B.Tech in Artificial Intelligence and Data Science,** Vidyanagar, Andhra Pradesh, India
*NBKR Institute of Science & Technology*

## SKILLS

- Frontend developer
- GitHub
- artificial intelligence
- Data Structures
- Java
- Advanced data structures
- Flask
- Linux
- Django
- Python

## LANGUAGES

**Telugu**
Native

**English**
Proficient

## INTERESTS

**Hobbies**
Full stack developer, AI Research, Competitive Coding, Blogging on Data Science Trends, Photography

## PROJECTS

**Restuarant website,** *Advanced*
- Frontend developement

**Library based on acedemic year,** *User friendly for students*
- Totally works on frontend developement

**Student counselling page**
Save the students time
- Full stack developement(both frontend and backend)

## STRENGTHS

**G Strengths**
Innovative Problem-Solving
Analytical Thinking
Adaptability
Collaborative Leadership

## KEY ACHIEVEMENTS

**Advanced resturant website, student Library**
Frontend developement
